**SOFT TISSUE SUPPORT BLEND FOR  
HEALTHY SOFT TISSUE RECOVERY  
WITH ADAPTOGENS AND  
CO-FACTORS★**

# **i-6Factor**

## ***i-6Factor is Formulated To:***

- For occasional sore muscles & stiffness deprivation\*
- Select antioxidants to handle oxidative stress\*
- Proteolytic enzymes to support natural resolution of the normal inflammatory process\*
- General support for handling occasional minor aches and pains\*
- Marine botanicals for all over support\*

From the dedicated athlete who works out every day, to the occasional sports participant, to the enthusiastic homeowner engaged in spring cleaning, we all expose our bodies to regular or intermittent muscle stress and strain. We are constantly subjecting our muscles to stresses sufficient enough to cause microscopic tears or strain on soft tissue, resulting in inflammation and soreness. These normal physical pressures are temporary, but in the meantime, there can be several days of discomfort and limited movement.

i-6Factor is designed to work with the body's own mechanisms to resolve occasional inflammation due to stress and strain on muscle tissue. It contains an exclusive combination of proteolytic enzymes, botanicals and select vitamins and minerals designed to naturally support the body's own processes that function to return tissue to its normal state after a minor injury.

***The First Choice  
To Counteract  
the Negative  
Effects of  
Inflammation!***

### Supplemental Facts:

Serving size: 2 capsules  
Servings per container – 180 capsules

| Amount Per Serving                                 | % DV  |      |
|--|-------|------|
| Vitamin C (as calcium ascorbate)                   | 120mg | 200% |
| Calcium (as calcium citrate and Calcium ascorbate) | 35mg  | 3%   |

**SORT TISSUE SUPPORT BLEND 575mg \*\***  
Irish moss algae (*Chondrus crispus*), rutin, protease 6.0, protease 5.4, citrus bioflavonoid complex, quercetin, neutral bacterial protease, bromelain, Serrazimes® –(endo-exo protease), grape (seed) ext., kelp (*Macrocystitis pyrifera*), papain

\*\*Daily Value (DV) Not Established  
Other Ingredients: ice bran and vegetable cellulose and water.

#### Contains Sulfites

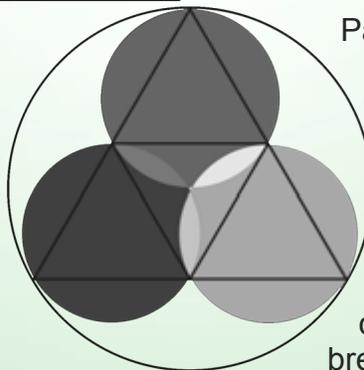

Serrazimes® is a registered trademark of National Enzyme Company®.

### Is i-6Factor Clinically Effective?

The individual herbs in i6-Factor Quercetin helps: improve athletic performance, upper respiratory tract infection, anti-inflammatory effects, anti-histamine and anti-allergy effect, anti-carcinogenic properties, cardiovascular protection properties, properties against thrombosis. It inhibits IgE, IgG mediated histamine and SRS-A (peptido-leukotriene mediated allergies. It also inhibits biosynthesis of pro-inflammatory arachidonic acid metabolites.

Bromelain taken before surgery can reduce the average number of days for complete disappearance of pain and postsurgery inflammation. It can act as an anti-inflammatory agent by reducing levels of prostaglandin E2 and thromboxane A2, inhibits neutrophil migration in response to IL-8 during inflammation and decreases pro-inflammatory chemokine and cytokine secretion. Used for treating acute inflammation and sports injuries.

Citrus bioflavonoids has been shown to decrease muscle soreness and joint injuries along with anti-bacterial and anti-viral properties.

Papain is used for pain and swelling (inflammation) as well as fluid retention following trauma and surgery.

Proteolytic enzymes (aka proteases) have been shown to: reduce systemic inflammation, cleanses the blood of debris, breaking down and removes circulating immune complexes, dissolving fibrin in the blood, reducing the risk of clots, boosting the immune system, killing bacteria, viruses, and other invading pathogens. Improved circulation, reduced risk of and response to food and pollen allergies. Accelerated recovery from sprains, strains, fractures, bruises, contusions, and surgery, faster recovery time from workouts, help with arthritis, sinusitis and asthma.
